Dear Valued Customers and Suppliers,

COVID-19 virus – UPDATE

Following recent developments, I would like to update you on the current situation at Leeds Bronze Engineering.

We are actively taking all possible measures to ensure the health and safety of our staff, their families and our customers. We remain operational while taking all necessary steps to support working from home protocols, social distancing and ensuring hygiene guidelines are followed.

Our policy is to maintain compliance with UK government recommendations. We will continue to make every effort to ensure that all our product delivery and service commitments are met in full.

With these actions we hope to minimize the impact of COVID-19 on our operations. However, we recognize that the situation is fast moving, and we are ready to implement additional measures in the future as recommended by the UK government.

Should the situation change we will inform you at once.

Please feel free to contact me directly if you have any questions, concerns or additional requests.

Sincerely,

Neil Unitt  
Sales and Marketing Director
